

EX.NO:6 - IMMUTABLE NATURE OF WRAPPER CLASSES (INTEGER AND DOUBLE)

Program:

```
public class WrapperImmutable {  
    public static void main(String args[]) {  
        Integer num = 100;  
        Double value = 45.5;  
  
        System.out.println("Original Integer : " + num);  
        System.out.println("Original Double : " + value);  
  
        num = num + 50;  
        value = value + 20.5;  
  
        System.out.println("Modified Integer : " + num);  
        System.out.println("Modified Double : " + value);  
    }  
}
```

Sample Output:

Original Integer : 100
Original Double : 45.5

Modified Integer : 150
Modified Double : 66.0
